Wolong Group

Wolong, founded in 1984 and headquartered in Shaoxing, Zhejiang Province, is a global leading industrial enterprise committed to providing safe, efficient, smart and green power drive system solutions with life-long supporting services to global users.

By utilizing cutting edge permanent magnet, nanotechnology and silicon carbide technologies, Wolong has built the China's first motor material demonstration platform, that satisfy the highest standards for power density and energy efficiency of motors and generators. With more than 30 years of development, the company has grown into one of the World's top three motor and drive manufacturers and sales enterprises. Wolong insists on technological innovation to lead the industrial reform, actively supports business digital transformation, continuously develops efficient drive system solutions and creates smart industry brain for the motor and drive life cycle management.

Product Overview

Product description

WEBP series variable-frequency adjustable speed three-phase asynchronous motor is an energy efficiency upgrading product independently developed by our company. The motor efficiency of the fundamental frequency 50Hz motor meets the GB 18613-2020 level 2 and 3 energy efficiency standards, and meets the IEC60034-30-1 IE4, IE3 and IE2 efficiency indicators.

The technical conditions of the motor shall comply with the standards of IEC60034-1 and GB755, and the installation dimensions and power level conforms to IEC standard, the customer can realize fast switching, and the comprehensive technical indicators have reached the domestic advanced level. It has the characteristics of wide speed range, high force and energy indicators, low temperature rise, reliable operation, convenient maintenance, etc. The motor uses high-temperature resistant grease, high-strength mechanical structure, independent fan cooling, and has the characteristics of large locked rotor torque, small locked rotor current, and high dynamic constant.

▼ Typical applications

WEBP series variable-frequency adjustable speed three-phase asynchronous motors can be widely used in spindle drive of CNC machine tools, constant torque and constant power speed regulation of textile, chemical, metallurgy, ports, docks, railways, waste processing plants and other industries, as well as energy-saving speed regulation of fans and pumps. High precision closed-loop operation can be achieved by matching high-precision sensors.

▼ Nomenclature

WEBP3 X - 160 M1-2 - X

Environmental code

(Default: indoor; details are as follows:)

F1: indoor, medium degree of corrosion resistance

F2: indoor, high degree of corrosion resistance

WF1: outdoor, medium degree of corrosion resistance

WF2: outdoor, high degree of corrosion resistance

TH: -humid tropical regions

G: plateau

Specification code: 160 represents motor center height is 160mm (or frame size is 160), the housing length is M, the core length is 1, and the pole number is 2

Frequency converter code (with independent fan by default, others are as follows)

Z: Brake frequency conversion

B: Encoder frequency conversion

H: Frequency conversion with brake and encoder

Product code: WEBP4 series, fundamental frequency efficiency of motor body IE4

WEBP3 series, fundamental frequency efficiency of motor body IE3

WEBP2 series, fundamental frequency efficiency of motor body IE2

Specification

	Standard product	Option
Frame size	80-355	-
Rated power	0.18~375kW	-
Number of poles	2P, 4P, 6P, 8P, 10P	-
Rated voltage	380V	220V, 230V, 400V, 415V, 440V, 460V, 480V, 690V, On request
Frequency	2P: 5~70Hz	60Hz, On request
	4P, 6P, 8P, 10P: 5~100Hz	-
Duty	S1	S2, S3 On request
Mounting option	B3	B5, B35, V1 etc.
Insulation	Class F	Class H
Connection	Below 3kW: "Y" connection 3kW or above: "Δ" connection	-
Enclosure	IP55	IP56, IP65, IP66
Cooling type	IC416	-
Frame material	Cast iron	-
Terminal box material	Aluminium	-
Terminal box position	Top	Right hand side, left hand side
Lubrication	H180 and below --Maintenance-free bearings,	H180, H160 -- Open type bearing with oil injection and discharge device
	H200 and above -- Open type bearing with oil injection and discharge device	-
Load characteristic	Constant torque speed regulation at 5-50Hz	Constant power speed regulation at 2P: 50-70Hz ,
		4P, 6P, 8P, 10P: constant power speed regulation at 50-100Hz
Thermal protection device	Thermistor winding protection	PTC, PTO, PT100, PT1000, Anti-condensation heater
Frequency converter	Independent fan	Brake, Encoder

Operating Conditions

- Ambient temperature: -20°C to +40°C
- Altitude: No more than 1000 m

※ Note: When the ambient temperature and altitude are different from those specified above, the provision of GB755 should prevail.

- Humidity: The monthly average maximum relative humidity does not exceed 90%

Note: Bearing selection can be changed according to the requirements of customers' working conditions. Choice angular contact bearings or short cylindrical bearings, for example.

Optional accessories

Thermal protection device is optional for WEBP series.

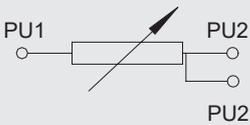

▼ Thermistor PTC

Name	PTC thermistor
Type	MZ6 160 D
Application	Motor overheating protection
Operating temperature and accuracy	160 ±5°C
Set position	1 in each phase, in series, at the highest temperature point embedded at the end of the winding at the drive end
Connection	Three components in series, two leads to the terminal box.
Color and marking of wiring	P1 & P2
Wiring diagram	
Frame	80-355

Note : (1) PTC operating temperature can be customized according to specifications.

(2) PTO thermosensitive bimetal switch can be used according to specifications.

▼ Winding Resistant Temperature Detector (RTD)

Name	Platinum Resistant Temperature Detector (RTD)
Type	PT100, three leads
Application	Motor winding temperature detection, high temperature protection
0°C resistance and precision	100± 0.12Ω (Class B tolerances)
Set position	1 in each phase, at the highest temperature point embedded at the end of the winding at the drive end
Connection	Each component has three lead wires to the terminal box
Lead Markings	<p>U — PU1, PU2, PU2 ; V— PVI, PV2, PV2; W— PWI, PW2, PW2.</p> <p>If there are two elements in each phase winding, the lead of the other element is marked as:</p> <p>U— PU3, PU4, PU4 ; V— PV3, PV4, PV4 ; W— PW3, PW4, PW4</p>
Wiring diagram	
Frame	160-355

▼ Bearing Resistant Temperature Detector (RTD)

Name	Platinum Resistant Temperature Detector (RTD)
Type	WZP-M, three leads, sealed metal body
Application	Motor winding temperature detection, over temperature protection
0°C resistance and precision	100± 0.12Ω (Class B tolerances)
Quantity	One per bearing
Set position	Embedded inside the endshield, the face of the sensor must contact the outer ring of the bearing
Connection	Each component has three lead wires to the terminal box.
Lead Markings	drive-end bearing (D E) — PD1, PD2, PD2 ; non-driven-end bearing (NDE) — PN1, PN2, PN2 If two elements are used for each end of the bearing, the lead of the other element is marked as: drive-end bearing (D E) - PD3, PD4, PD4 ; non-driven-end bearing (NDE) - PN3, PN4, Pn4
Wiring diagram	
Frame sizes	160~355

According to temperature measuring elements, K or T type thermocouples can be fitted as an alternative.

▼ Anti-condensation heater

Name	Anti-condensation heater										
Application	Prevent condensation within the motor, which would lead to low insulation resistance										
Temperature resistance of insulating material	≥250°C										
Rated voltage	AC single-phase, 220 - 240V (order schedule)										
Set position	Bound to the winding overhang										
Connection	Two lead wires to the terminal box										
lead Marking	H1 & H2										
Wiring diagram											
Frame	100	112	132	160	180	200	225	250	280	315	355

Quantity	1	1	1	1	1	1	1	1	1	2	2

▼ Terminal device of protective equipment

- When the motor is installed with PTC or PTO, its wiring shall be in the main terminal box with eight-post terminal board.
- When the winding or bearing of motor is loaded with PT100, its wiring is arranged in an independent auxiliary terminal box and equipped with terminal bank.
- When the motor is only equipped with winding heating belt, its wiring is on the wall of the main terminal box. (d) When the motor is assembled with heating belt and PT100, the heating belt shall be connected on the wall of the main terminal box, and the PT100 connection shall be located in an independent auxiliary terminal box with terminal bar.
- When the motor is assembled with heating belt and PTC, the heating belt shall be connected on the wall of the main terminal box, and the PTC shall be connected on the eight-column terminal board of the main terminal box.

Ordering guide

▼ The following factors should be taken into account in motor selection:

- Voltage: 380 V 660 V 400 V 690 V Others.
- Frequency: 50 Hz 60 Hz Others.
- Mounting type: IMB3 IMB35 Others.
- Operating environment: Indoor Outdoor Ambient temperature Altitude.
- Protection grade: IP55 IP56 Others.
- Equipment type and moment of inertia of load.
- Connection mode between the motor and load.
- Start mode, start frequency, start voltage drop, etc.
- Operating mode: S1 Others.
- Insulation grade: 155 (F) 180(H), Nanometer insulation.
- Rotation direction: Clockwise Counterclockwise Bidirectional.
- Wiring box position: Top of motor Right side of motor Left side of motor (viewed from the shaft extension end).
- Supply voltage and frequency of independent fan.

▼ Example of demand:

- Requirements: Frame size 200, 30kW, 2P, fixed feet, no flange at the end cover, 380/660V, 50Hz, fundamental frequency efficiency of motor body IE3, clockwise rotation, protection class IP55, insulation grade F.
The motor label is as follows: WEBP3-200L1-2 30kW 380/660V 50Hz IMB3 IP55 F.
 - If you have any special requirements for voltage, frequency, protection grade, rotation direction, installation mode, dual-shaft extension, noise, vibration and wiring box connection, consult the local technical personnel for approval before manufacturing.
